Name one problem with the following parallel coordinates chart?

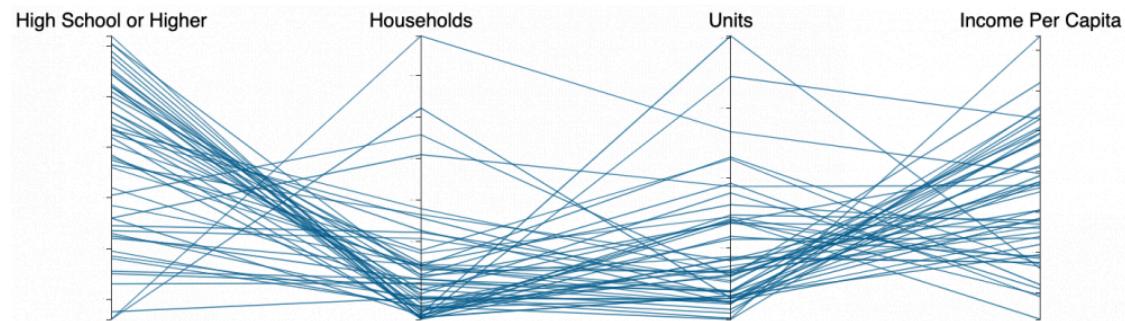

- All of the options above are true
- The labels on the color scale legend are incomplete
- The axis labels should be on top
- The color scale used is incorrect
- There is nothing wrong with this chart

Which of the following is an accurate critique of this parallel coordinates chart?

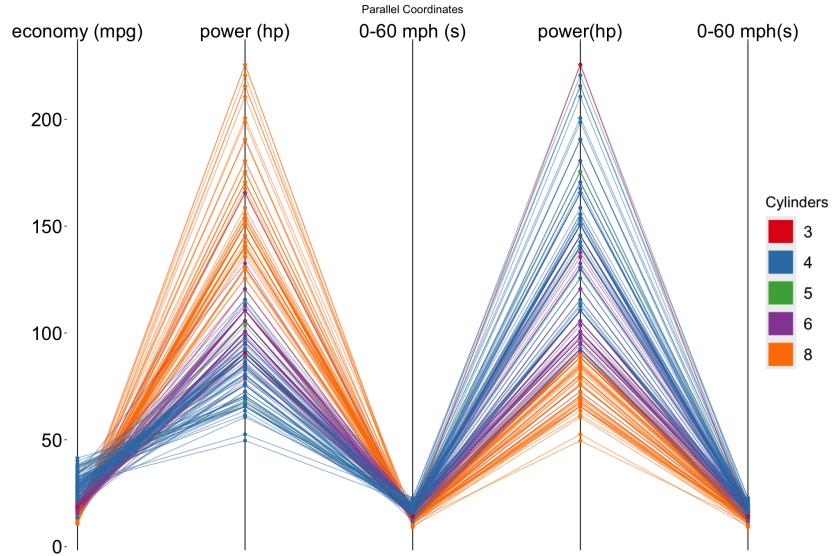

- All of the above
- The chart does not use color
- The chart is missing a color legend
- The chart is missing axis labels

Name one thing that could be wrong with the following parallel coordinates plot?

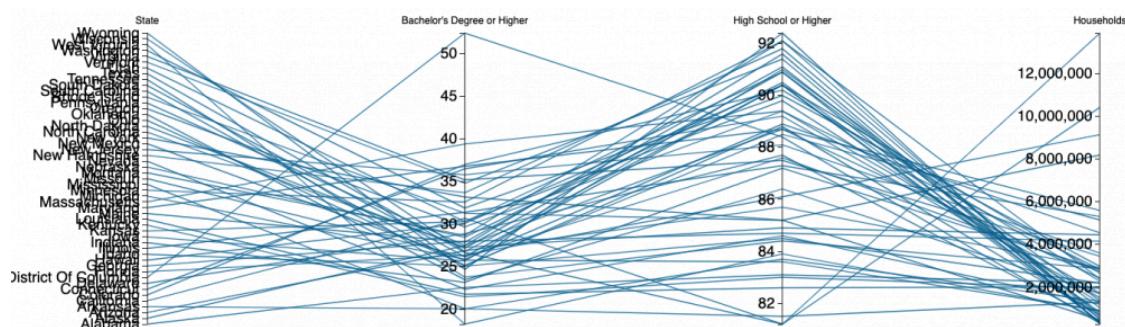

- The chart is missing data labels
- There are too many overlapping lines
- The chart does not use color
- All of the above

What is wrong with the following parallel coordinates plot?

- The chart does not contain a color legend
- There is nothing wrong with this chart
- The chart contains repeated axes
- The chart uses too many colors

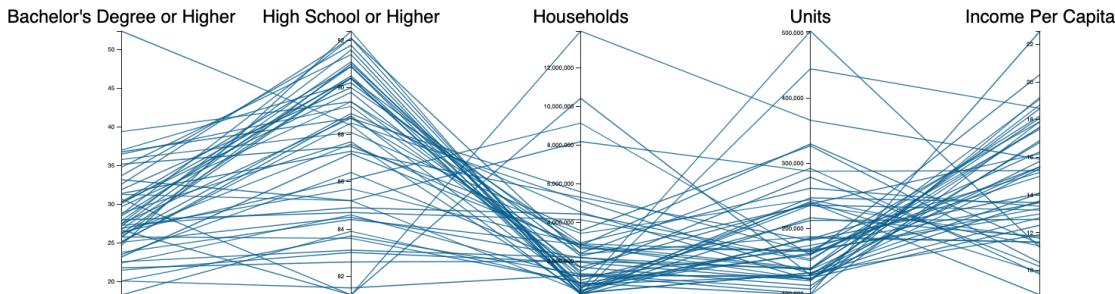

What is wrong with the following parallel coordinates plot?

- There are too few axes in this chart
- The chart does not use color
- There is a lot of text clutter in the first axis

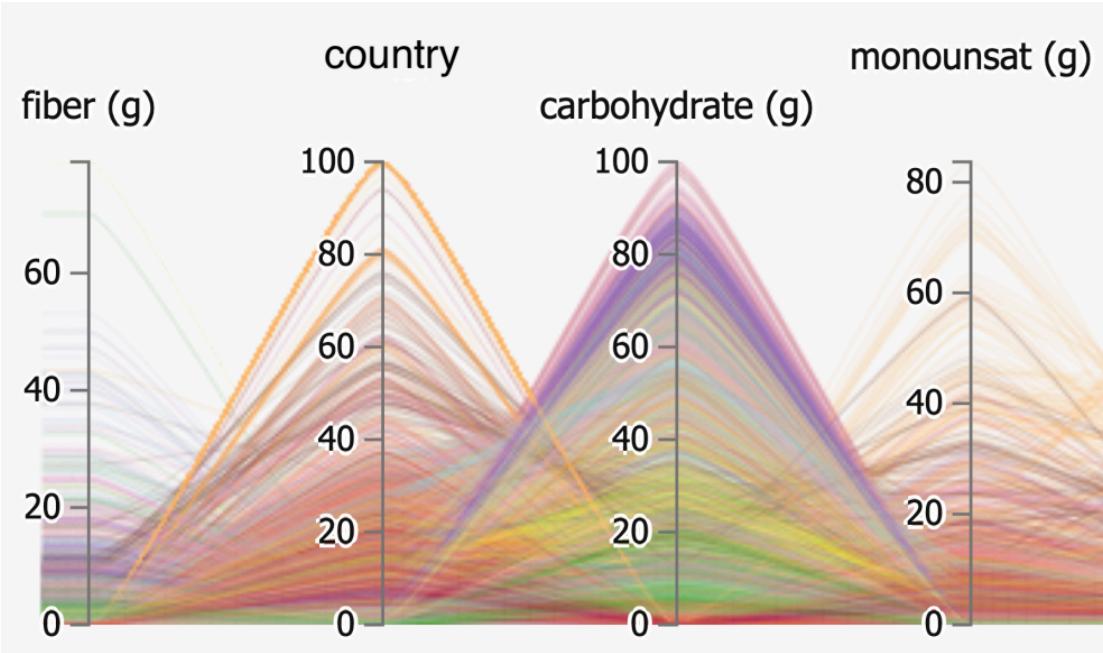

- The chart is missing a color legend

What is wrong with the following parallel coordinates plot?

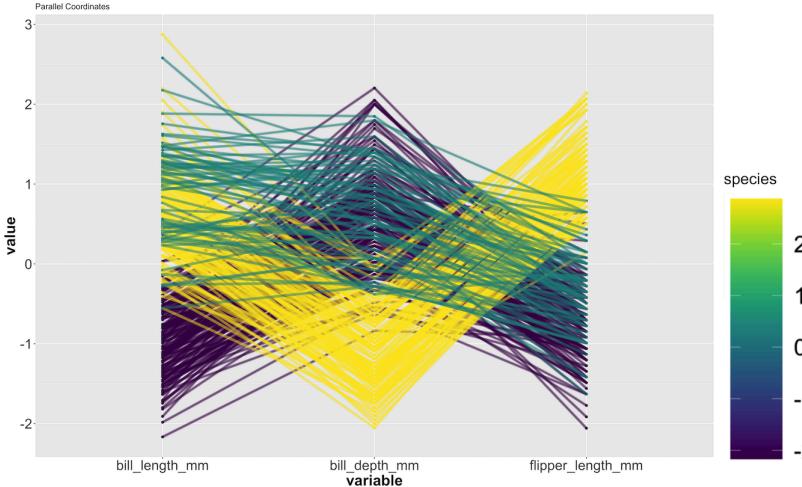

- The data labels on each axis are too small
- The chart does not use color
- It is missing a color legend
- The axis labels are too small

Name one thing that could be wrong in this chart.

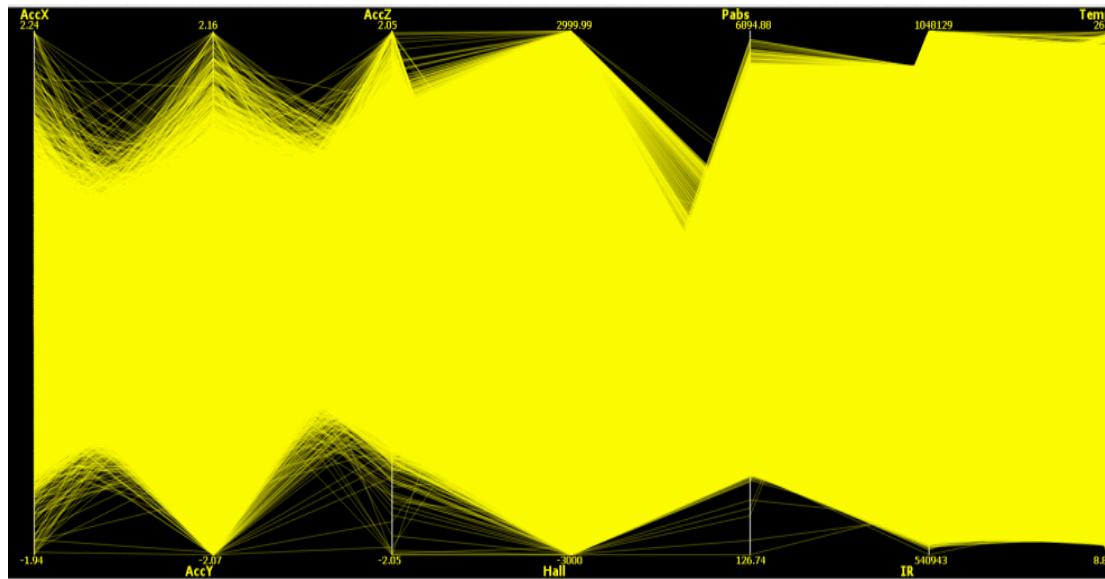

- The axis labels seem inconsistent with the data being displayed
- The chart shows fiber in grams instead of ounces
- There is nothing wrong with this chart
- The chart has too many colors

For this chart visualizing data about penguins of three different kinds of species (Adelie, Chinstrap, and Gentoo), what is the problem with this chart.

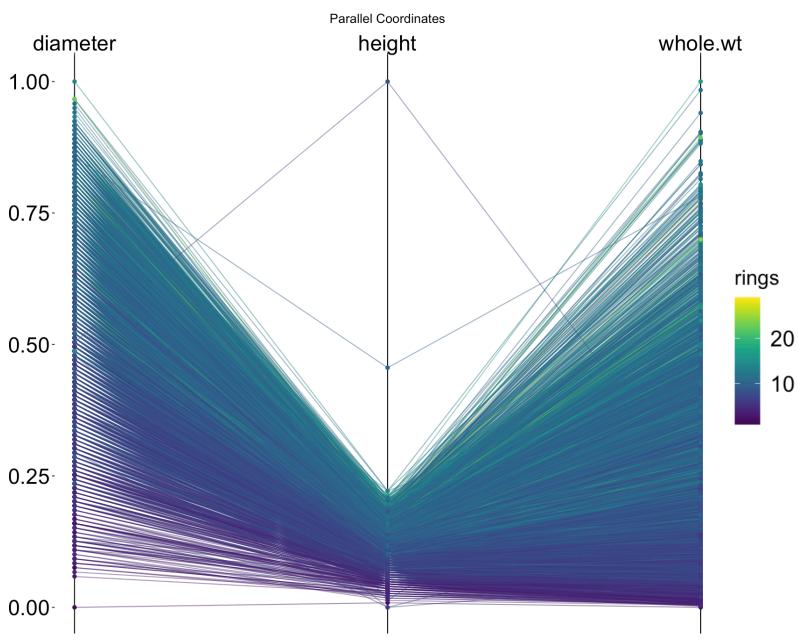

- The color legend is incorrect for this chart
- The lines are too opaque/thick
- There are too many colors
- There is nothing wrong with this chart

What is wrong with this parallel coordinates chart?

- The axes labels are hard to read
- No color legend is displayed
- The chart has too much data in it
- There are too many axes in this chart

What is wrong with this chart?

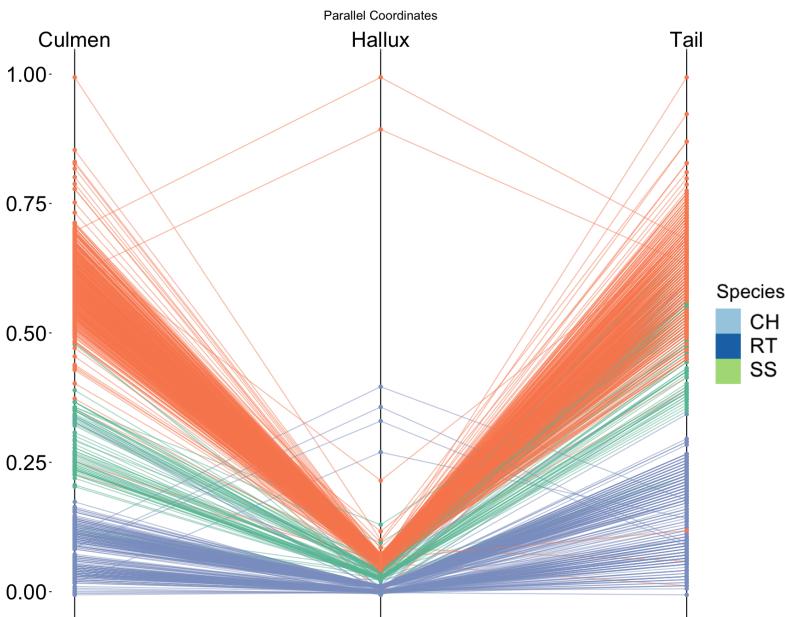

There is nothing wrong with this chart

The axis titles are missing

The color legend is not properly labeled

There is no data on the chart

Name one problem with this chart.

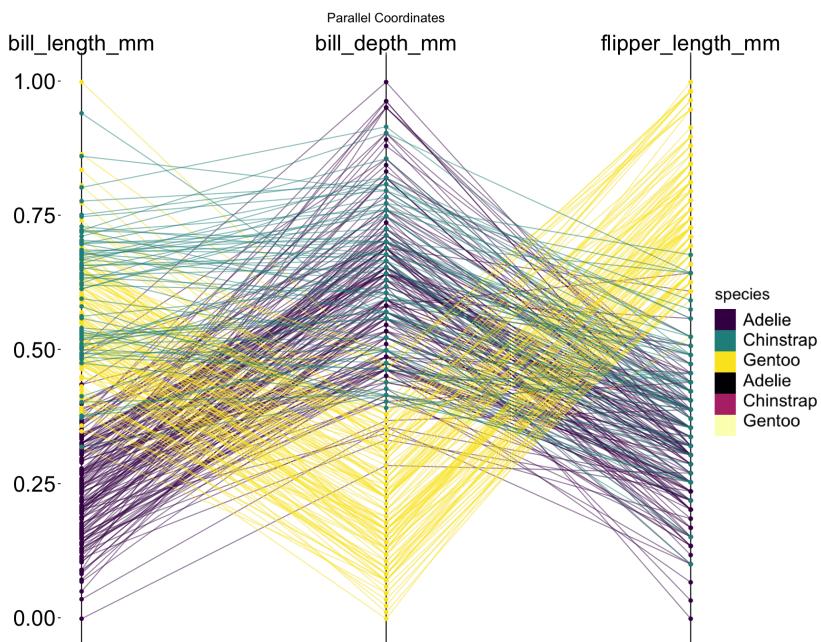

The slopes of the edges is too high

The color legend has the wrong colors

There is nothing wrong with this chart

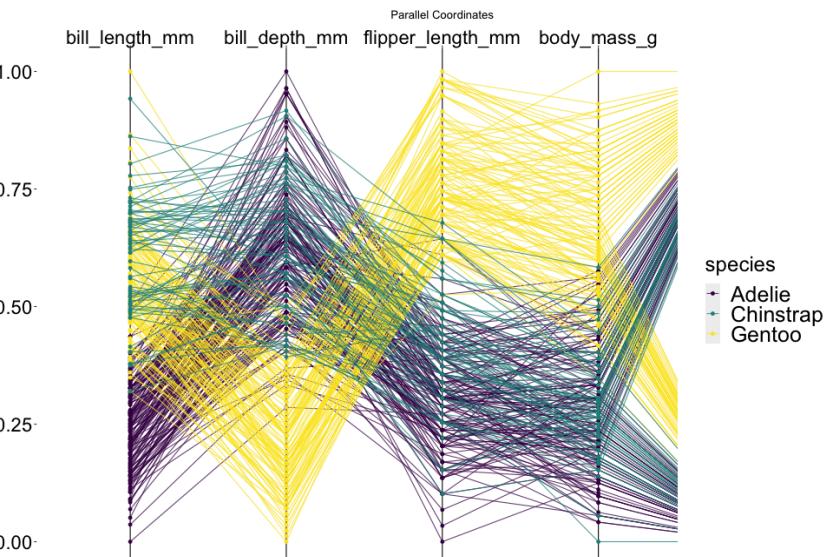

The axis titles are missing

Name one problem with this chart.

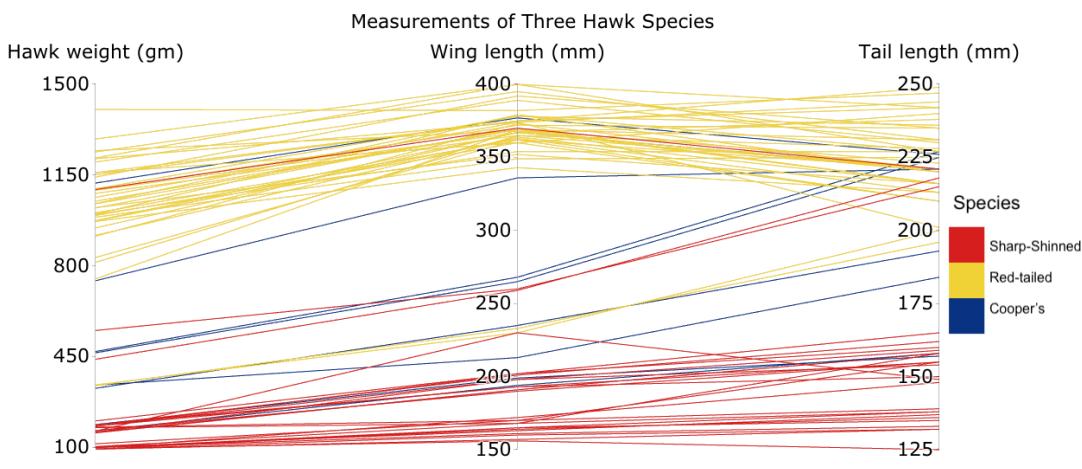

- The color legend is not labeled
- There are too many color legends
- There are too many colors
- There are too many variables in this chart

What is wrong with the following chart?

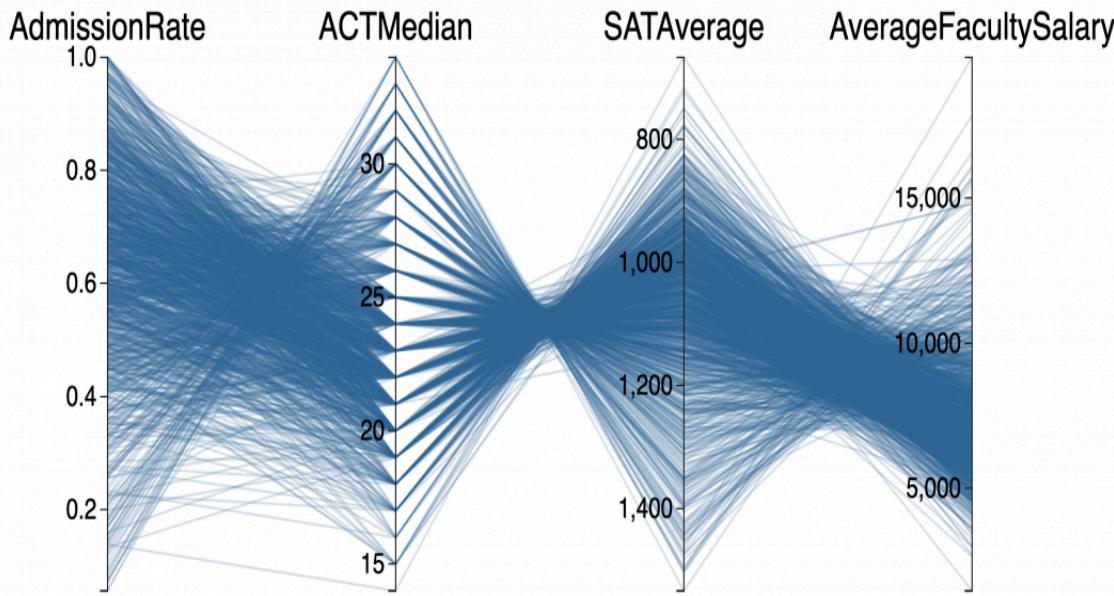

- There is nothing wrong with the chart
- The color legend is not shown
- The chart has too many colors
- The chart is missing one of the axes

Name one problem with this chart.

- The axis labels are too small
- There is nothing wrong with this chart
- The legend is incorrect
- The data labels are too small

Name one problem with the following chart.

- There is no problem with this chart
- The axis labels are too small
- The data labels are too small
- The axes are not all ordered the same (ascending/descending)
- There are too many overlapping lines
